About This Game

Brief Overview

A modern spin on an old classic! Asteroids Millennium provides exciting new game play without departing from the feel of its predecessors. Collect power ups, dodge threats, and blast away at asteroids and enemies alike in this survival game that is truly fun to play.

Enemy Hazards

Two types of enemy-based hazards: **enemy fighters** that fire at your ship, and **swarm ships** that try to overwhelm you! Both get more difficult to overcome as you progress through the levels.

Upgradable Lasers

Four different laser upgrades: collect power ups to boost your fire power!

Special Abilities

Three awesome special abilities can be acquired by collecting other power ups: lightning charges, shield bubbles, and magnetic fields!

Hyperspace

Gone are the days of random hyperspace jumps! If you're overwhelmed, jump into hyperspace and quickly select a new location to spawn!

Other Features

- Endless level-based play
- Realistic asteroid collision and physics
- Also supported: a "classic" game play mode with no power ups
- Configurable keyboard controls
- Online leaderboard and achievements

Available for Windows and Linux!

This is not my asteroids.

The boost is way over throttled so you get way too fast instantly, the game doesn't support stretched full screen so you have a black box around the whole game, rocks don't split after you hit them once, and you select where you spawn.
